The US 221 Treescape project focused on the 5 mile stretch of road from Interstate 26 to SC 295. The enhancement money paid for the beautification along the shoulders of the road as well as the medians. Along the shoulders of the road, larger growing trees such as Oaks and Red Maples were planted. Smaller growing trees, such as Dogwoods and Crape Myrtles, were chosen for the medians. This project greatly enhanced a busy stretch of road in Spartanburg County.
