

Tyger River Greenway

Trail

Spartanburg County Parks and Recreation Community

\$ 125,000

Year: 2007

The Tyger River Greenway is located along the North Tyger River from SC 296 to US 29 and Middle Tyger River from Middle Tyger Library to Startex Mill Area. The function of Tyger River Greenway is to negotiate with existing easement holders to provide links for longer trails and connections with established public transportation routes. The trail corridors will begin and end adjacent to main state highways, US highways or within a half mile of an interstate intersection. This is significant because there are several other trail corridors either planned or in progress along the same waterways which could form a link to provide even better connectivity with existing bike and pedestrian points.
