

I-585 / USC Upstate Access Improvement Project

Beautification

USC Upstate

\$81, 588

Year: 2004

The enhancement of this section of road includes the beautification of roads built and/or improved by the I-585 USCS Access Improvement project. Landscaping was done on East Campus Blvd and Valley Falls Road. Landscaping and scenic beautification was completed on both sides of the road as well as the medians. Some of the trees planted along this stretch of road were Nuttall Oak trees and Willow Oak trees. This beautification project provides visual interest for commuters and travelers.
