

Business-85 Shoulder Treescape Beautification

Spartanburg County / Men's
Garden Club

\$55,000

Year: 2005

The Business-85 Shoulder Treescape project concentrated on a 7.3 mile stretch of the interstate. The purpose of this project was to enhance the shoulders of the interstate with landscaping and scenic beautification. There were approximately 375–425 trees planted along this busy interstate to help control the noise level as well as the air quality. Some of the trees that were planted include: Willow Oak trees, Crape Myrtle trees, Redbud trees, and many more. Commuters and travelers enjoy seeing the beautiful variety of trees as they drive this section of Business-85.
